Abstract

This document is for banks and other reporting institutes submitting KaFE (Kapitalertragsteuer-Erstattung, capital income tax refund) applications under section 50c(3) of the German Income Tax Act. The KaFE Refund Application Request format is a module of the [OpenFASTER](#) family: a self-documenting data model (with an accompanying Excel template) that mirrors the official BZSt KaFE v1.4.0 schema. See [the Response document](#) for the (currently provisional) decision-notice channel.

2. The KaFE Refund Application Request module§

The KaFE (Kapitalertragsteuer-Erstattung) **refund application** format defines the data required to apply, under section 50c(3) of the German Income Tax Act (EStG), for a refund of German withholding tax on capital income. A single application (Erstattungsantrag) covers the applicant's identity and legal basis of claim, tax treatment, payment details, and every taxed income event (Ertrag) the application concerns, including the section 50j EStG securities-lending/holding-period block where applicable. An accompanying self-documenting Excel template is published alongside this specification (see [Downloads](#) above); each sheet mirrors one logical group below, with every field's English description, type constraints, and requiredness in the header rows.

2.1. Source schema§

The data model of this module is derived from the XML Schema Definition (XSD) published by the BZSt (Bundeszentralamt für Steuern), the German Federal Central Tax Office, as part of its DIP (Digitale Poststelle) mass-data interface for the KaFE procedure.

OpenFASTER treats the BZSt XSD as the machine source of truth: the field definitions, requiredness, enumerations, the [data dictionary](#) in this document, and the accompanying Excel template are all generated directly from it. As the BZSt schema evolves, regenerating from the updated XSD keeps this specification and the template in lock-step with the BZSt source.

2.2. Data model§

An application is decomposed into several logical groups (rendered as separate sheets in the Excel template). Groups are linked by two keys used together, not one — see [Linking model](#) below.

Group	Rows per creditor	Purpose
Creditors Natural / Juridical	1 per creditor	The applicant's identity, legal basis of claim, tax treatment, and payment details.
Certificates Of Residence	0..n	Certificate-of-residence validity windows, referenced by income events.
Income	0..n	Each taxed capital-income event (Ertrag): type, security, amounts, and the section 50j EStG block where it applies.
Investment Chain	0..n	The chain of indirect holdings for an income event, when applicable.
Transaction Data	0..n	The per-depot transaction ledger supporting the section 50j EStG holding-period test.

2.3. Linking models

Unlike MiKaDiv's own single RequestId key, a KaFE application is linked across sheets by two keys used together: creditorId (the key on the Creditors Natural / Juridical sheets and the first column on every other sheet) identifies which applicant a row belongs to, and incomeId (present on Income, Investment Chain, and Transaction Data) identifies which specific taxed income event within that applicant's application a row belongs to. creditorId alone links Certificates Of Residence back to a creditor; creditorId and incomeId together link Investment Chain and Transaction Data rows back to one specific Income row.

2.4. Legal basis and income type

KaFE has no request-type taxonomy analogous to MiKaDiv's New Report/Correction/Cancellation distinction — every application is the same Erstattungsantrag type. Differentiation instead happens on two independent axes:

Anspruch (legal basis of claim) is a set of seven independent booleans, not an enum: Abkommen (double-taxation agreement), Par43bEStG, Par44aEStG, Par50gEStG, Par32Abs6KStG, Art63AEUV (Article 63 TFEU), and IntOrg (international organisation). Any combination of the first six may be true together; IntOrg is mutually exclusive with all of them — a real cross-field rule enforced by BZSt's own validation (status code 2101), not expressible as a plain XSD constraint, so it is stated here rather than left implicit.

KapArt (type of capital income) is an 11-value enum on each individual Ertrag, describing what kind of capital income that specific line concerns (dividends, distributions from non-listed corporations, various profit-participation-right forms, convertible bonds, life insurance, and others — see [Enumerations](#) for the full list and meanings). This is a per-income-line classification, not a submission-level type.

Note on AntragPar11InvStG. A conforming producer will notice a boolean field named AntragPar11InvStG on the Creditors Juridical sheet. Its presence does not mean section 11 InvStG (Investment Tax Act) refund claims can be submitted through KaFE — per the official BZSt communication handbook (section 2.1), such claims cannot be submitted through this interface at all. AntragPar11InvStG only lets a submitter affirmatively confirm that a refund under section 11 InvStG has neither been applied for nor made to the BZSt or another tax authority; it is not itself a channel for making such a claim. Earlier revisions of this document documented the field as if it were, which was a self-contradiction relative to this section — corrected in version 4.3.2 (see [Version history](#) below).

2.5. Resubmission

KaFE has no formal typed lifecycle on the submission side. Per the official BZSt communication handbook: "Files that contain non-valid data are rejected. Violations of conditional mandatory field specifications in individual applications thus lead to the rejection of the entire file. After correcting the errors, an error-free file can be resubmitted. Alternatively, a file containing only the error-free records can be transmitted." There is no correction/cancellation message type, no typed reference from a new application back to a previous one, and no partial-amendment format — resubmission means submitting a fresh, complete Erstattungsantrag with a new AntragId. (BZSt's own decision-notice schema does have a typed correction concept — BescheidArt = KORREKTUR — but that is on the response side; see the [Response document](#).)

2.6. Submission receipt (KAFE-RM)§

After a delivery is submitted, BZSt returns a synchronous KAFE-RM receipt: a file-level result plus, per Erstattungsantrag (correlated by the submitter's own AntragId), either a RegistrierNr (a 9-character BZSt-assigned case number, present only when that application was accepted) or a ValidierungsergebnisListe (present only when it was rejected — one or more StatusCode/Hinweis pairs identifying exactly what failed; see [Status and error codes](#) below for the full catalog). This receipt is documented here, in the Request document, rather than in the Response document — it is the synchronous half of what a bank directly experiences submitting data, unlike the asynchronous KAFE-VA decision notice.

3. Submission receipt fields§

A KAFE-RM receipt batches one Antrag entry per submitted Erstattungsantrag, correlated back to the submitter's own AntragId. Each entry carries either a RegistrierNr (on acceptance) or a ValidierungsergebnisListe (on rejection), never both. Fields below are grouped by where they appear in that structure.

3.1. Per-application response§

Field	Required-ness	Type / Allowed values	Description
AntragId	Required	UUID (xxxxxxxx-xxxx-xxxx-xxxx-xxxxxxxxxxxx)	In der Lieferung angegebene UUID des Antrages.
RegistrierNr	Required	Text (9 characters, BZSt-assigned)	Aktenzeichen unter der der Antrag beim BZSt registriert wurde (Registriernummer).

3.2. Validation result (on rejection)§

Field	Required-ness	Type / Allowed values	Description
StatusCode	Required	Text (max 4)	Statuscode des Validierungsergebnisses (0000 = OK).
Hinweis	Required	Text	Hinweis zum Validierungsergebnis.

3.3. Status and error codes§

Every code BZSt's ValidierungsergebnisListe may report, grouped by the same numeric ranges the official handbook itself uses. A submitter's own validation logic (and any troubleshooting of a rejected delivery) should treat this table as the authoritative reference — it is the complete catalog, not a curated subset.

4. Status and error codes§

Every status code KAFE-RM's ValidierungsergebnisListe may report, grouped by the numeric range the official handbook itself uses.

4.9. Version history§

Divizend has published and maintained this interface specification since 2023; the following table is the complete version history, carried forward from the specification's prior, hand-maintained form.

Version	Date	Summary of changes
1.0.0	2023-08-29	Initial release.
1.1.0	2023-09-25	Minor formatting improvements.
2.0.0	2024-01-30	Added three new "TaxTreatment" properties within "creditorsNatural" (only for Swiss beneficiaries). Added four new "Questions_for_50j" properties within "creditorsJuridical" (only for beneficiaries with a country/legal form combination from the section 50j country/legal-form matrix). Updated possible values for "CapitalIncome" within "income" according to BZSt updates (removed HINTERLEGUNGSSCHEINE, added GRENZKRAFTWERK_RHEIN, GENUSSRECHTE_MIT_LIQUIDATIONSERLOES and GENUSSRECHTE_OHNE_LIQUIDATIONSERLOES). Corrected "Business_Establishment/Business_Establishment_DE" within "income" to now be required (technically only needed for juridical entities). Fixed typo in column name "Economic_Ownership/Ownership_and_Right_To_Use" within "income". Removed section "Divizend's approach to bulk processing" because it is deprecated and will be moved to a new bulk processing manual. Updated section "Input file

Version	Date	Summary of changes
		structure" according to recent developments.
2.1.0	2024-02-10	Added instructions on how to use the bulk processing within the Divizend platform (new section 7). Fixed heading of section 5.2 to be "Required files".
		MAJOR changes (action required): Use version 3 in the "meta" sheet. Make sure to use the updated templates. Removed the field "CreditorNat/General_Data/Nationality" from the "creditorsNatural" sheet and this documentation, because it is not needed by the BOP anymore. MAJOR changes (incompatibilities with version 2): Added a section on character set limitations. Added BOP-defined length restrictions to most fields with type "String". Marked "generalData/LegalForm" in "creditorsJuridical" as required. Marked "Bank/Account/BIC" and "Bank/Account/IBAN" in both sheets "creditorsNatural" and "creditorsJuridical" as required. Marked the fields relating to a beneficiary's TIN as required, i.e. "CreditorNat/General_Data/IDNumber_CountryOfResidence" (in "creditorsNatural") and "CreditorJur/General_Data/IDNumber_CountryOfResidence" (in "creditorsJuridical"). MINOR changes: Added a section on semantic versioning. Added a section on terminology and roles, explaining the terms "Creditor", "Authorized representative" and "Authorized recipient". Added note that XLSX must be provided, not CSV. Added a link to demo data. Added a section on data types, explaining the types "String", "Number" and "Boolean". Added a section on tax certificates, explaining the format and legal basis for tax certificates.
3.0.0	2024-05-22	

Version	Date	Summary of changes
		PATCH changes: Various formatting improvements.
3.1.0	2024-07-01	MINOR changes: Marked "CreditorNat/German_TaxOffice/Inquiry_TaxReturn" in "creditorsNatural" as required. Marked "CreditorJur/German_TaxOffice/Inquiry_TaxReturn" in "creditorsJuridical" as required. Marked "AuthorizedRep/General_Data/LegalForm" in "creditorsNatural" and "creditorsJuridical" as required. Marked "Economic_Ownership/Ownership_and_Right_To_Use" in "income" as required. Added a section on required, optional and semi-required fields, including input data cluster constraint details. Made the "Required" column contents more precise.
3.2.0	2024-07-03	MINOR changes: Marked "TaxTreatment/Taxation_Treatment" in "creditorsJuridical" as required. Marked "Business_Establishment/Business_Establishment_DE" in "income" as required. Clarified "Required" column contents for "InvTaxAct/StatusCertificateDetails/..." fields in "creditorsJuridical". Clarified "Description" and "Required" column contents for "Depository_Receipts/..." fields in "income".
3.2.1	2024-08-07	PATCH changes: Fixed "Required" column contents for "CreditorNat/German_TaxOffice/TaxNumber/State" and "CreditorNat/German_TaxOffice/TaxNumber/Number" from "creditorsNatural".
4.0.0	2024-09-16	MAJOR changes (incompatibilities with version 3): Use version 4 in the "meta" sheet. Make sure to use the updated templates. Moved to the new DIP (Digital inbox) implementation of electronic submission. Changed

Version	Date	Summary of changes
		submission flow so that transferring the claims directly submits them to the BZSt instead of waiting for Divizend employees to validate the submission. Added three new worksheets that need to be present in the "data.xlsx" file: certificatesOfResidence, investmentChain and transactionData. Added, removed and updated multiple fields concerning the creditorsNatural, creditorsJuridical and income worksheets. Changed the claim grouping to no longer separate claims containing depositary receipts but rather split claims by certificate of residence validity. Introduced new documents to upload. MINOR changes: Removed the section on Robotic Process Automation and renamed a section to "Divizend's DIP implementation". Updated the limitations concerning file sizing.
4.0.1	2025-01-17	PATCH changes: Added a note about section 11 InvStG to the introduction. Fixed typos in the requirement conditions for fields "CreditorNat/German_TaxOffice/TaxNumber", "CreditorJur/German_TaxOffice/TaxNumber", "CreditorJur/OptingUnderCorpTaxAct/TaxAuthority" and "CreditorJur/OptingUnderCorpTaxAct/FileName". Minor formatting fixes.
4.1.0	2025-02-07	MINOR changes: Added a new legal basis for reclaim applications, "LegalBasis/Par32Abs6KStG", with the associated new data requirements. Added a requirement for Italian residents to specify if they are German citizens in "CreditorNat/General_Data/NationalityIsDE" — if so, these creditors must provide information about their tax liability in Germany. Renamed

Version	Date	Summary of changes
		the "TaxTreatment/SwitzerlandQuestions/LiabilityEnded" field to "CreditorNat/German_TaxOffice/LiabilityEnded" as the requirement to include it has changed. Restructured the information on holding periods for substantial holdings to accommodate the DTA requirements from Japan and Australia. The tax certificate serial number in "DocumentProof/TaxCertificateNumber" is now required for dividends after 2026-12-31 instead of 2024-12-31. Applicants from Singapore wishing to submit applications for inflows that happened before 2021-12-31 no longer have to provide section 50j EStG data. PATCH changes: Removed a document-attachment note that was no longer relevant. Added unrequired address fields that were previously missing.
4.2.0	2025-10-08	MINOR changes: Fixed spelling mistakes in field "TaxPrivileges/StructuralConnectionToGermany/TaxPrivilegedPurposesDE". Fixed spelling mistakes for "AuthorizedRep" (previously "AuthroizedRep") and "District" (previously "Distrcti"). Changed the condition for the "ISIN" field. Changed the conditions for providing a confirmation of tax payment. Replaced prose attachment-requirement sections with a table. Changed legal representative "LegalRep/NatPerson/Name" to "LegalRep/NatPerson/LastName" to match the template content.
4.3.0	2026-03-23	MINOR changes: Added "UnlimitedForeignCorporateTaxLiability" and "CreditAmount" to the income sheet. Changed the conditions for including "TaxExemption". Added fields "CreditorNat/General_Data/TinAvailable" and "CreditorJur/"

Version	Date	Summary of changes
		General_Data/TinAvailable" and changed the conditions for including "CreditorNat/General_Data/IDNumber_CountryOfResidence" and "CreditorJur/General_Data/IDNumber_CountryOfResidence". Added a "Proof of tax credit" document attachment. Upgraded to KaFE schema version 1.4.0.
4.3.1	2026-06	Changed various field lengths to match the required values from the German Tax Authorities. Corrected the format of "TaxTreatment/W-IdNr".
4.3.2	2026-08-25	MINOR changes: Restructured into the OpenFASTER family's schema-driven documentation format — this document is now generated directly from BZSt's own published KaFE v1.4.0 XSD family rather than hand-maintained prose. Added a provisional Response document covering the KAFE-VA decision-notice schema, not previously documented at all. Added a full status/error code reference (previously undocumented). Fixed: the section 11 InvStG self-contradiction (previous versions documented "AntragPar11InvStG" as if section 11 InvStG claims were submittable via this interface, contradicting this document's own statement that they are not); the Par32Abs6KStG requiredness-column format inconsistency (a free-text conditional value where every other entry used a fixed Required/Optional/Conditional vocabulary); ambiguity in TransaktionsId sequencing scope (now stated explicitly: sequential and non-gapped per depot, not globally).

4.10. Section 50j EStG^s

Section 50j EStG (a German anti-cum-ex/securities-lending abuse rule) requires additional data for capital income falling within its scope, captured on each Ertrag via the optional Par50jEStG block and, for the transaction ledger specifically, on the [Transaction Data](#) sheet. Almost every field in this block is minOccurs="0" in the raw XSD — real conditional-mandatory logic (country- and legal-form dependent) lives entirely in the [status-code catalog](#) above, not in the schema's structure, so this specification marks these fields Conditional rather than Optional even though the XSD alone would suggest otherwise.

Holding period (Haltedauer). The minimum holding period is 45 days, measured within a window beginning 45 days before and ending 45 days after the income's due date, using FIFO. HaltedauerMin45T counts shares held at least 45 days uninterrupted within that window; HaltedauerMin1J (conditional on HaltedauerMin45T > 0, and never exceeding it) counts, of those, shares also held at least one year; HaltedauerKuerzer45T counts shares held less than 45 days; AnteilePar50jEStG is HaltedauerMin45T minus HaltedauerMin1J.

Minimum value-change-risk retention (MinWertAendRisiko). Only relevant for shares that meet the minimum holding-period requirement under section 50j(1) but are not already covered by section 50j(4) sentence 2. GegenlAnsprueche records whether there were offsetting claims during the minimum holding period; when true, RisikoMin70 (conditional) records the number of shares for which the applicant bore at least 70% of the value-change risk during that period. GegenlAnspruecheAndere asks the same offsetting-claims question at the level of the entire share class, not just the section-50j-scoped shares.

Forwarding obligation (WeiterlVerpflichtung). WeiterlVerpfl records whether there was a direct or indirect obligation to pass on the capital income; when true, WeiterlVerpflAnteile (conditional) gives the affected share count. WeiterlVerpflAndere asks the same question beyond the section-50j-scoped shares.

Return obligation (RueckgabeVerpflichtung). Applies when capital income derives from shares transferred under civil law on or before the dividend date — securities loans, repurchase agreements (repos), and comparable spot contracts must be specified. RueckgabeVerpfl records whether such an obligation existed; when true, RueckgabeVerpflAnteile (conditional) gives the affected share count.

Per-depot transaction ledger (Transaktionsdaten). For every depot holding shares of the security, the full development of the holding —including all position changes and loan transactions — must be reported for the period from one year before the income's inflow date to two months after it: Anfangsbestand/AnfangsbestandDatum (opening balance, dated exactly one year before the inflow date), every Transaktion in between (each carrying Handelstag [trade date], Transaktionsart [ZUGANG/inflow or ABGANG/outflow], Geschaeft [transaction type —P0 purchase, S0 sale, TL transfer due to securities lending, RL retransfer due to securities lending, TP transfer due to repo, RP retransfer due to repo], Stueckzahl [share count], and both an agreed and an actual settlement date), and Endbestand/EndbestandDatum (closing balance, dated exactly two months after the inflow date — BZSt's own worked example: an inflow date of 2023-04-25 requires an EndbestandDatum of exactly 2023-06-25). TransaktionsId must be sequential and non-gapped starting at 1 within each depot — not globally across depots or across the whole application — per BZSt's own validation rule (status code 7601); if no transactions occurred for a depot in the reporting window, a single "shell" transaction carrying only depot information, and none of the trade-specific fields, is required instead of an empty transaction list.

4.11. Conformance requirements§

A conforming producer MUST populate every field marked Required for each group it emits. Fields marked Conditional MUST be populated when the condition stated in their description holds, and MUST otherwise be omitted or left empty. Fields marked Optional MAY be omitted.

Enum-typed fields MUST carry one of the values enumerated for that field in [Enumerations](#). A conforming consumer MUST reject an application whose enum-typed field carries a value outside the enumerated set.

5. Data dictionary§

The following field-level definitions are generated from `kafe.xsd`. Each group below corresponds to one sheet of the accompanying Excel template. The `creditorId` column links the groups of a single disclosure together.

5.1. 3 Certificates Of Residence§

Significance. One row per certificate of residence (Ansässigkeitsbescheinigung): issuing authority, issue date and validity period.

Cardinality. 0..n rows per `creditorId`.

When to fill. Whenever an income on the Income sheet references it via `CertificateOfResidenceId`.

#	Field	Required-ness	Type / Allowed values	Description
1	<code>creditorId</code>	Required	Text (identifier used to link the sheets; any unique value)	Foreign key. Must match an id value on the '1 Creditors Natural' or '2 Creditors Juridical' sheet (whichever this creditor is a natural or juridical person).
2	<code>id</code>	Required	Text (identifier used to link the sheets; any unique value)	Identifier for this certificate of residence, defined by you. Referenced by the <code>CertificateOfResidenceId</code> column on the Income sheet.
3	<code>Issuer</code>	Required	Text (max 80)	Issuing authority
4	<code>IssuedAt</code>	Required	Date (YYYY-MM-DD)	Date of issue
5	<code>ValidFrom</code>	Required	Date (YYYY-MM-DD)	Valid from
6	<code>ValidUntil</code>	Required	Date (YYYY-MM-DD)	Valid until

5.2. 4 Income§

Significance. One row per taxed capital income event: type of income, security identification, the debtor, the amount and date of inflow, the tax certificate/other-document details, the beneficial-ownership and residency questions, the indirect-holding and substantial-holding questions, the remittance-base clause, and (where section 50j German Income Tax Act applies) the Par50jEStG holding-period / risk / forwarding / return-obligation block.

Cardinality. 1..n rows per `creditorId`.

When to fill. Always -- every application needs at least one taxed income.

#	Field	Required-ness	Type / Allowed values	Description
1	<code>creditorId</code>	Required	Text (identifier used to link the sheets; any unique value)	Foreign key. Must match an id value on the '1 Creditors Natural' or '2 Creditors Juridical' sheet (whichever this creditor is a natural or juridical person).

#	Field	Required-ness	Type / Allowed values	Description
2	incomeId	Required	Integer	Sequence number of the income, starting with 1 (KaFE's own ErtragId). Also serves, together with creditorId, as the linking key referenced by the '5 Investment Chain' and '6 Transaction Data' sheets.
3	CertificateOfResidenceId	Required	Text (identifier used to link the sheets; any unique value)	Foreign key. Must match an id value on the '3 Certificates Of Residence' sheet -- identifies which certificate of residence supports this income.
4	CapitalIncome	Required	Enum (KapitalertragArt): DIVIDENDEN, AUSSCH_KAPG, GENUSSR_ML, GENUSSR_OL, WANDELANL, LEBENSVERS, EINNSTILLG, PART_DARL, GEWINNOBL, GRENZKW, SONSTIGE	Type of capital income
5	Stocks_ConvertibleBonds/ISIN	Optional	ISIN (12-digit)	ISIN (12-digit)
6	Stocks_ConvertibleBonds/NumberOfShares	Optional	Decimal (4 decimals)	Number of shares/bonds
7	SubstantialHolding/IsSubstantial	Optional	Enum (Boolean): true, false	Is it a substantial holding (at least 10 %)?
8	SubstantialHolding/Ownership	Optional	Decimal (4 decimals)	Size of the ownership interest (in %)
9	SubstantialHolding/HoldingPeriod18M	Optional	Enum (Boolean): true, false	Has the investment been held for a period of at least 18 months?
10	SubstantialHolding/HoldingPeriod12M	Optional	Enum (Boolean): true, false	Has the investment been held for a period of at least one year?
11	SubstantialHolding/HoldingPeriod6M	Optional	Enum (Boolean): true, false	Has the investment been held for a period of at least 6 months?
12	IndirectHolding/IndirectHolding	Required	Enum (Boolean): true, false	Is it a joint deposit/account or another form of indirect holding?
13	IndirectHolding/CompanyOfSpouses	Optional	Enum (Boolean): true, false	
14	IndirectHolding/SizeOfIndirectHolding	Required	Decimal (4 decimals)	Size of the indirect holding (in %)
15	Debtor/Name	Required	Text (max 256)	Debtor of the capital income / distributing company
16	Debtor/TaxNumber	Optional	Text (max 13)	Tax number
17	NonResidency_DE	Optional	Enum (Boolean): true, false	Was the person with limited tax liability a resident of the specified country of residence at the time of the inflow and did not have its registered office or place of management in Germany at that time?
18	DateOfReceiptOfCapitalIncome	Required	Date (YYYY-MM-DD)	Date of receipt of capital income
19	GrossIncomeFromCapitalReceived	Required	Decimal (2 decimals)	Gross income from capital received (in Euro)
20	Withheld_Taxes	Required	Decimal (2 decimals)	Withheld German capital income tax (in Euro)
21	Requested_Refund	Optional	Decimal	The refund amount being claimed for this income (informational; BZSt itself computes the actual refund from the withheld tax and the applicable treaty/statutory rate -- this is not a real KaFE XSD field).
22	DocumentDescription	Required	Text (max 120)	Short description of the file content (e.g. certificate of residence).

#	Field	Required-ness	Type / Allowed values	Description
23	DocumentProof/ TaxCertificateNumber	Optional	UUID (xxxxxxxx-xxxx-xxxx-xxxx-xxxx-xxxxxxxxxxxx)	Serial number
24	Hidden_ProfitDistribution/ Constructive Dividend	Optional	Enum (Boolean): true, false	Does it concern a constructive dividend?
25	Economic_Ownership/ Ownership_and_Right_To_Use	Required	Enum (Boolean): true, false	Did the person with limited tax liability hold the beneficial ownership (right to use the income) at the time of the inflow?
26	TaxExemption	Optional	Enum (Boolean): true, false	Was the person with limited tax liability fully (or partially) exempt from tax in the specified country of residence at the time of the inflow?
27	LifeInsurancePolicyNumber	Optional	Text (max 40)	Policy number of the life insurance
28	Depository_Receipts/ Is_DR	Optional	Enum (Boolean): true, false	Are they depository receipts? e.g. American Depositary Receipts (ADR).
29	Depository_Receipts/ ISIN_DR	Optional	ISIN (12-digit)	ISIN of the underlying (12-digit)
30	RemittanceBase/IsSubject	Required	Enum (Boolean): true, false	Werden die Erträge im angegebenen Ansässigkeitsstaat nur dann der Besteuerung unterworfen, wenn sie dorthin überwiesen oder dort bezogen worden sind (Überweisungsklausel)?
31	RemittanceBase/Amount	Optional	Decimal (2 decimals)	Betrag, der in den Ansässigkeitsstaat überwiesen oder dort bezogen wurde.
32	Business_Establishment/ Business_Establishment_DE	Optional	Enum (Boolean): true, false	Has the capital income distributed to a permanent establishment / fixed entity located in Germany of the person subject to limited taxation?
33	UnlimitedForeignCorporateTaxLiability	Optional	Enum (Boolean): true, false	Was the person with limited tax liability subject to unlimited corporate income tax liability or a comparable tax liability in their country of residence without any option to choose?
34	CreditAmount	Optional	Decimal (2 decimals)	To what extent was the German capital gains tax credited in full or in part against taxation in the country of residence or deducted from the tax base, or is it possible to carry this forward to future tax periods (tax credit carryforward)?
35	Questions_for_50j/ HoldingPeriod/ HoldingMore45D	Conditional	Decimal (4 decimals)	Anzahl der Anteile, die innerhalb des Mindesthaltezeitraums an mindestens 45 Tagen ohne Unterbrechung gehalten wurden (§ 50j Absatz 4 Satz 2 EStG).
36	Questions_for_50j/ HoldingPeriod/ HoldingMore1Y	Conditional	Decimal (4 decimals)	Davon Anzahl der Anteile, die im Zeitpunkt des Zuflusses mindestens ein Jahr ohne Unterbrechung gehalten wurden (§ 50j Absatz 4 Satz 2 EStG).
37	Questions_for_50j/ HoldingPeriod/ HoldingLess45D	Conditional	Decimal (4 decimals)	Anzahl der Anteile, die kürzer 45 Tage gehalten wurden.
38	Questions_for_50j/ HoldingPeriod/ SharesPar50jEStG	Conditional	Decimal (4 decimals)	Anzahl der Anteile im Sinne des § 50j EStG.
39	Questions_for_50j/ MinValueChangeRisk/ OpposingClaims	Conditional	Enum (Boolean): true, false	Hatte die beschränkt steuerpflichtige Person oder eine ihr nahestehende Person während der Mindesthaltedauer gegenläufige Ansprüche?

5.3. 5 Investment Chain§

Significance. The chain of companies through which an indirect holding (MittelbareBeteiligung) is held: each link's organisation, legal form, ownership percentage, country of residence, tax number/TIN, and whether it is exclusively asset-managing.

Cardinality. 0..n rows per (creditorId, incomeId) pair, ordered by SequenceNumber.

When to fill. Only when the corresponding income's IndirectHolding/IndirectHolding = true.

#	Field	Required-ness	Type / Allowed values	Description
1	creditorId	Required	Text (identifier used to link the sheets; any unique value)	Foreign key. Must match an id value on the '1 Creditors Natural' or '2 Creditors Juridical' sheet (whichever this creditor is a natural or juridical person).
2	incomeId	Required	Text (identifier used to link the sheets; any unique value)	Foreign key. Must match an incomeId value on the '4 Income' sheet for this creditorId.
3	SequenceNumber	Required	Integer	Sequence number of the holding. From the person subject of limited taxation to the debtor oft he capital income / distributing company, starting at 1.
4	Organization Name	Required	Text (max 256)	Company name
5	LegalForm	Required	Text (max 80)	Legal form
6	Ownership	Required	Decimal (4 decimals)	Size of the ownership in interest (in %)
7	Country	Optional	Enum (CountryISOAlpha2): AD, AE, AF, AG, AI, AL, AM, AO, AQ, AR, AS, AT, AU, AW, AX, AZ, BA, BB, BD, BE, BF, BG, BH, BI, BJ, BL, BM, BN, BO, BQ, BR, BS, BT, BV, BW, BY, BZ, CA, CC, CD,	Country of residence

5.4. 6 Transaction Data§

Significance. The per-depot transaction ledger required by section 50j German Income Tax Act: opening/closing balance (repeated per transaction row), each transaction's direction, business type, share count, trading day and settlement dates.

Cardinality. 0..n rows per (creditorId, incomeId) pair, grouped by DepotNumber.

When to fill. Only when the corresponding income's Par50jEStG block applies.

#	Field	Required-ness	Type / Allowed values	Description
1	creditorId	Required	Text (identifier used to link the sheets; any unique value)	Foreign key. Must match an id value on the '1 Creditors Natural' or '2 Creditors Juridical' sheet (whichever this creditor is a natural or juridical person).

5.5. 1 Creditors Natural§

Significance. One row per creditor who is a natural person: identity, address, German tax office details, the authorised representative and legal representative (if any), the legal basis for the refund claim, bank details, the Switzerland questions, the affirmations, and (if claiming under section 32(6) German Corporate Tax Act) the tax-privileged-purposes block.

Cardinality. Exactly 1 row per creditor (this sheet defines that creditor's id).

When to fill. Always, for every creditor who is a natural person.

#	Field	Required-ness	Type / Allowed values	Description
1	id	Required	Text (identifier used to link the sheets; any unique value)	Identifier for this creditor, defined by you. Referenced by the creditorId column on every other sheet.
